

# Vision for mainstreaming biodiversity in Uganda

- All Government programmes be it on biodiversity conservation and management have to be aligned to, and contribute to the implementation of the National Development Plan (NDP)
  - The NDP is a planning framework and aims at assisting Government in eradicating poverty and transforming Uganda from a peasant society to modern and prosperous country.
  - The vision of the current NBSAP for Uganda is *a rich biodiversity benefiting present and future generations for national development*
  - Therefore the vision for mainstreaming biodiversity in Uganda is to have *a rich biodiversity for national development and livelihood improvement*
- 

# **Biodiversity Goal**

The Goal of the current NBSAP is:

“ to enhance biodiversity  
conservation, sustainable  
utilization and equitable sharing  
its benefits at all levels”

# Mainstreaming outcomes

- ☐ Effective coordination and strong frameworks for biodiversity management
- ☐ Information generation and flows on biodiversity
- ☐ Positive impacts of biodiversity on national development
- ☐ Sustainable use and equitable sharing of costs and benefits from biodiversity
- ☐ Awareness among stakeholders on biodiversity
